

I'm sending this comment in response to a recent filing to replace K-LOVE FM91.1 with LPFM. K-LOVE is an important program to each community they cover. In addition to worldwide news coverage, they also provide content (including music) critical to the Christian community.

A replacement of this service for LPFM would not be in the best interest of the local public. K-LOVE is an established national network that provides a positive and encouraging message to all who listen. It is critical that the Commission considers this in the decision-making process.
